How the student buys it

1. Buy the app from the store for the student's device (links at readaloudforme.com).
2. The store emails a receipt showing the price and tax paid.
3. Give that receipt to Accessibility Services for the funding claim.

What the student gets

Reading aloud of documents, PDFs, web pages and photos of printed pages, with word highlighting and adjustable speed. Reading happens on the device: no sign-up, nothing uploaded, and no generative AI or chatbot is involved in reading. Works without an internet connection once installed. Students can try the free version first and buy PRO once their funding is approved.
